

Hardware Certification Report

FAILED

5 passed · 2 failed · 3 unsupported · 10 tests · 26m 15s

SYSTEM	root@vps-ac97e687.vps.ovh.net
OPERATING SYSTEM	AlmaLinux 10.2 (Lavender Lion) x86_64
RUN ID	check-49a1ecb8
PROFILE	check
PRESET	—
PASSES	1
STARTED	2026-06-05T20:23:26Z
FINISHED	2026-06-05T20:49:42Z

Controller system

OS	AlmaLinux 10.2 (Lavender Lion) x86_64
Host	OpenStack Foundation OpenStack Nova 19.3.2
Kernel	Linux 6.12.0-211.7.4.el10_2.x86_64 x86_64
Uptime	7 days, 3 hours, 59 mins
Packages	743 (rpm)
Python	3.12.13 (venv)
CPU	Intel Core Processor (Haswell, no TSX) (1 logical CPUs)
GPU	Cirrus Logic GD 5446
Memory	546.8 MiB / 1.87 GiB (29%)
Swap	Disabled
Disk (/)	8.77 GiB / 18.7 GiB (47%) - xfs
Local IP	141.95.86.222 (eth0)
Locale	en_US.UTF-8
SELinux	Enforcing
FIPS	disabled

Certification results

#	Test	Scope	Status	Duration	rc
001	Hardware detection	profile	passed	61.3s	0
002	Containers	profile	passed	112.3s	0
003	KVM	profile	failed	59.4s	0
004	CPU stress	profile	passed	171.9s	0
005	Network	profile	unsupported	37.6s	0
006	MD RAID	profile	unsupported	48.7s	0
007	Linux Test Project	profile	passed	963.7s	0
008	Phoronix	profile	failed	43.4s	0
009	GPU Burn	profile	unsupported	41.4s	0
010	CloudLinux limits	profile	passed	36.0s	0

5 passed, 2 failed, 3 unsupported, 0 skipped — total 1575.5s

Notes

KVM (failed): kvm run_test.sh exited rc=1

Network (unsupported): network test needs a distinct SUT (local/single-host run)

MD RAID (unsupported): no MD RAID array present on the SUT

Phoronix (failed): ansible recap reported ignored tasks

GPU Burn (unsupported): nvidia-smi not found; NVIDIA driver/runtime is not installed; AlmaLinux 10.2 has native NVIDIA packages: dnf install almalinux-release-nvidia-driver; dnf install nvidia-open-kmod nvidia-driver nvidia-driver-cuda; reboot or modprobe nvidia_drm; rerun gpu_burn
